Headquarters for
Hardy Pecan Trees That Bear Young Trees, Buds, Budding & Pecan Land

Stephenville, Texas

Mr. E. A. Reed,
Nut Specialist
U.S. Dept of Agr.
Washington, D.C.
A Few Letters from Our Many Satisfied Customers

Gorman, Texas, June 8, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Dear Mr. Wolfe: I bought 84 trees from you in the Fall of 1925. I have not lost a single tree. Yours very truly,
(Banker and Farmer) E. L. HALE.

Breckenridge, Texas, June 8, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Gentlemen: While I did not order any extra nice trees from you, every one you shipped me looks as though it had been selected from your choicest stock. Your trees have the best root system that I have ever seen on young pecan trees which accounts for the rapid growth after setting. I appreciate your promptness in filling my little orders and will recommend you and your nursery stock to anyone in the market for the same.
(Merchant) JESS AKERS.

Junction, Texas, June 14, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Dear Sir: The pecan trees I purchased from your nursery last fall are all living, having runners two and three feet long, and are the thriftiest trees that I have ever seen. Again thanking you for the nice trees you sent me, and wishing your nursery much success, I am, Yours very truly,
(Sheep and Goat Breeder) N. H. SKAGGS.

Handley, Texas, June 11, 1926.—Ross R. Wolfe, Stephenville, Texas. Dear Sir: The trees I bought from you last December (125 Halberts), are all living and have made very satisfactory growth. These are the best trees I have ever seen.
(Railway Mail Clerk) J. T. HALBERT.

Fort Worth, Texas, Box 1051, June 9, 1926.—Mr. Ross R. Wolfe, Stephenville, Texas. Dear Mr. Wolfe: Every one of the 60 pecan trees that I got from you the past season are living and growing nicely. They were as nice a lot of trees as anyone could want. The root system is the most desirable I have ever seen anywhere. Very truly yours,
(Postoffice Clerk) R. A. BRIDGES.

Blackwell Sanitarium, Gorman, Texas, June 14, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Dear Sirs: I bought 69 of your trees last February a year ago, all are living but four, 12 were 4-6 ft. trees, and seven of these have from 4 to 33 pecans to the tree. I am very much pleased. Yours very truly, GEO. T. BLACKWELL.

Dublin, Texas, June 8, 1926.—Ross R. Wolfe, Stephenville, Texas. Dear Mr. Wolfe: In February, I bought 32 budded trees from you, I visited my orchard yesterday, and I have 33 living, you remember one tree had a double root, and we discussed the propriety of splitting this tree and making two. I did this, hence the extra tree. Yours truly,
(Methodist Pastor) J. B. CURRY.

Grandview, Texas, June 10, 1926.—Mr. Ross R. Wolfe, Stephenville, Texas. Dear Sir: I bought 50 trees from you all of which are living and doing fine. I think you have the best root system I have ever seen. I am, Respectfully,
(Farmer) W. S. WHITE.

Eastland, Texas, June 18, 1926.—Mr. Ross R. Wolfe, Stephenville, Texas. My Dear Sir: Last Fall I purchased from you more than 100 6-8 ft. pecan trees. I think I have not seen a finer collection of trees at any time or place. Recently I visited my farm and found that nearly all if not all of the trees are living. I am certainly very much pleased with them. In fact after extended business dealings with you, I take pleasure in saying that I have every reason to appreciate the manner in which you have treated me. I am, Very truly yours,
(Attorney) J. R. STUBBLEFIELD.
Lipan, Texas, June 11, 1926.—Mr. Ross R. Wolfe, Stephenville, Texas.
Dear Sir: The 12 pecan trees I bought from you last winter are all living, one tree has 3 pecans on it. I think this hard to beat.
(Farmer) J. B. WILSON.

Colorado, Texas, June 26, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Gentlemen: I bought 116 trees from you last Winter, have only lost one, which was caused by being planted too shallow. All the others are growing fine. When you get out a new catalogue, mail me one, as we want to plant 20 acres more to pecans this winter. Yours very truly,
(Merchant) H. L. LOCKHART.

San Antonio, Texas, June 23, 1926.—Wolfe's Pecan Nursery, Stephenville, Texas. Dear Sir: I purchased 100 pecan trees from you last fall, I do not think a single one missed growing. I am well pleased in every way with your service. Wishing you success I am, Very truly yours,
(DR. L. F. ROBICHAUX.

Wichita Falls, Texas, June 22, 1926.—Mr. Ross R. Wolfe, Stephenville, Texas. Dear Sir: The man on my place advises me that of 100 pecan trees put out, which I purchased from you, 100% are living. Yours very truly,
(Oil Operator) J. C. STRAUS.
A Pecan Orchard is a Good Investment

1. BECAUSE the cultivated pecan is the best and nature's own product. It is the most economical, hardy, and profitable of all the food plants. It grows where no other food plant can grow. It thrives on a minimum of care and work. It is a valuable tree, and its fruit is a delicacy that is enjoyed by the people of the world.

2. Pecan trees are hardy and will grow on any soil that will support grass. They are not particular about their soil. They will grow on sandy loams, clay soils, and loamy soils. They will grow on hillsides and in valleys. They will grow in the desert and in the mountains.

3. Pecan trees are adaptable to any climate. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

4. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

5. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

6. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

7. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

9. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.

10. Pecan trees are not particular about their water. They will grow in any part of the United States, from the Gulf of Mexico to the Pacific Ocean, from the Great Plains to the Rocky Mountains. They will grow in all the states of the United States, except for a few in the northern part of the country.
PLANTS FOR SALE—We have more than 2000 top-worked trees on which we are growing more than 25 varieties. We can ship your order, large or small, for budding or grafting. Burket, Texas; Sabin, Alexander, and Western Schley; $2.00 per hundred; $20.00 per thousand. 4c per box in quantities of less than one hundred. 10c all of the above prices to County Agents, Commercial Budders, and Nurseriesmen. Count guaranteed, postage and express prepaid.

PATCH BUBBING KNIFE—Made with safety razor blades. The kind we use, 50c each.

HALBERT—*Pecan*—Equal to 37.51.; condition nuts promising nut tree. Ready of order, $20.00 in advance.

BURKETT—Callahan County, Texas: Burkett is our most popular pecan. It is a favorite most all over the State. The nut in this folder is one of a set sent us by R. F. Netts, San Angelo, Texas, which weighed 57 nuts to the pound, and listed 56" in length. Burkhett usually have the curved yar, tree very healthy, and regular bearer. We own the exclusive right to the Mother Burkett tree. We will more Burkett nuts than trees in all other varieties combined. Burkett should have another variety with it for perfect pollination.

ALEXANDER—Coahuila, Texas: Ranks 57 nuts per pound, 60% meat. More prolific than Halbert. Not larger, tree healthy, very promising.

WILSON'S WONDER ENGLISH WALNUT—A hardy variety we are introducing, 50 nuts of which weigh a pound. Can be budded or grafted on native or black walnut. Each 20c per dozen. No trees for sale yet.

KIND—From San Saba County, Texas: Six large; shell of medium thickness; kernel plump, medium very good, fuzzy sweet. Very prolific. Especially recommended for Western Texas.

SAN SABA IMPROVED—San Saba, Texas: Ranks 61; meat, 55 nuts per pound. This shell, good cracking quality, well filled; excellent color and shape. Very valuable.

WESTERN SCHLEY—San Saba, Texas: Ranks 59 nuts per pound, 49% meat. Thin shell; good cracking quality. Valuable for Western conditions. Very prolific.

ONLAW—San Saba, Texas: Ranks 67; meat, 50 nuts per pound. Very thin shell. Excellent cracking quality. Equal to the best.

SCHLEY—Burket, Texas: Ranks 51 nuts per pound, 52.5% meat. This shell, good color and shape, good cracking quality.

BERT—De Leon, Texas: Ranks 53 nuts per pound, 54% meat. Medium thin shell, extra fine cracking quality; good color and shape. Desirable.

MOST—Center Post, Texas: Ranks 55 nuts per pound, 55% meat. One of the most prolific of any variety yet observed. Very promising on account of its unusual production.

BURLS FOR SALE—We have more than 2000 top-worked trees on which we are growing more than 25 varieties. We can ship your order, large or small, for budding or grafting. CROW PECANS LIKE THESE

WESTERN

SOVEREIGN—Texas: Favorite—San Saba, Texas; Number per pound, 52; flavor of the highest order, 54. The tree is beautiful, healthy, and in the heavy bearing class; offers producing nuts in the nursery row. You can recognize it from its terminal by its silky foliage. We likely never able to supply the demand for seedlings as it is difficult to propagate. Order early. We are holding our introduced trees from buds taken from the mother tree.

BURKETT—Callahan County, Texas: Burkett is our most popular pecan. It is a favorite most all over the State. The nut in this folder is one of a set sent us by R. F. Netts, San Angelo, Texas, which weighed 57 nuts to the pound, and listed 56" in length. Burkhett usually have the curved yar, tree very healthy, and regular bearer. We own the exclusive right to the Mother Burkett tree. We will more Burkett nuts than trees in all other varieties combined. Burkett should have another variety with it for perfect pollination.

HALBERT—Coahuila, Texas: Halbert is the most prolific of all varieties. It bears in the nursery row. Not in medium size, shell very thin, kernel unusually plump, quality rich, flavor excellent. Should be planted in West Texas and places of similar climatic conditions. Should be one of the best varieties for the Plain and Western Oklahoma, being early in season.

ALEXANDER—Coahuila, Texas: Ranks 57 nuts per pound, 60% meat. More prolific than Halbert. Not larger, tree healthy, very promising.

WILSON'S WONDER ENGLISH WALNUT—A hardy variety we are introducing, 50 nuts of which weigh a pound. Can be budded or grafted on native or black walnut. Each 20c per dozen. No trees for sale yet.
